

Ceramic Elements

Sefar Filtration offers a unique solution for high temperature dust/particle/fume removal to industry.

Product Features

Ceramic Elements

Sefar Filtration proudly represents BWF Envirotec, producers of the KE85 range of Ceramic Filter Elements for particle removal in high temperature applications.

The dust removal of exhaust gases at high temperatures at an early stage is being demanded not only from an economical but also from an ecological point of view. Textile filter media made from synthetic fibres reach their limits in hot gas filtration because of their inadequate temperature resistance and their combustibility.

The KE85 range of high temperature ceramic elements has proven ideal for many applications where more demanding environments are evident.

Product Features

■ Fibre material is harmless as opposed to fibreglass	
Not sensitive to sparks	
■ Non flammable	
Excellent chemical resistance	
Self supporting elements (no cages required)	
■ High air permeability	
■ Lowest emission rates (<1 mg dust/Nm2)	
■ Light weight	
Fields of Application	
■ Carbide fumes	
■ Wood combustion	
■ Pyrolysis of contaminated solids	
■ Recycling of radio-active material	
■ Non-ferrous metal smelting furnaces	
■ Catalyst fluidised bed	
■ Waste incineration	
■ Calcinations process	
■ Precious metals	
■ Precious metals	
■ Precious metals	

■ High temperature applications up to 850 °C (peaks possible to 1000 °C)
