

Vacuum Dryer Belts

SEFAR TETEX DRY is a range of specialized dryer belt fabrics for use in effective and efficient industrial drying of foods and pharmaceutical products. As a result, these products have to meet the highest regulatory demands.

Product Features

Sefar filter solutions for Vacuum Belt Dryers

Sefar offers a wide range of synthetic fabrics in open and closed mesh for conveying and drying products. Our vacuum dryer belts are made of PET polymer – selected according to your needs.

- Belt fabrics offering different pore sizes for different solid contents (viscosity) of products
- Customized solutions that meet the industry’s most demanding requirements (e.g. high temperatures, chemical resistance and long lifetime)
- Integrated production: all crucial steps from yarn production, weaving, finishing and fabrication of ready-to-use belts
- Around 190 years of experience in the food industry. With over 40 years supplying belts for vacuum belt dryers
- All belt fabrics and closures are recommended for applications in the food industry and are compliant with food safety regulations

Permeability properties Unique permeability settings allow steam to penetrate the fabric and eliminate bubble formation while sustaining performance with solid content > 30%

Mechanical stability Precision controlled fabric finishing provides low shrinkage/elongation and efficient belt alignment as well as long service life. Suitable for application temperature of up to 180 °C.

Reduced downtime Fast and easy installation supported by efficient closing system. Belts are ideal for CIP cleaning.

Clogging resistance Smooth surface makes product release easy and reduces particle entrapment in the pores of the fabric.

Food safety compliancy All components comply with food safety regulations during full service life.

Product features

We manufacture dimensionally precise SEFAR **TETEX** DRY fabrics for any type and any size of application, equipment or machine. Choose from our various fastening solutions and different edge enhancement possibilities that would best suit your requirements.

The choice for the most commonly utilized drying spectrum

SEFAR TETEX DRY PET fabrics are suitable for application temperatures of up to 140° C. Usage at 140 – 160 °C is possible but not recommended as it will result in reduced service life and higher belt elongation. Between 140 – 180 °C a special

Filter media technology

A selection of different pore sizes allows optimum drying at maximum air/vapor permeability.

Excellent cake release, superb quality and lifetime, ensures efficient and cost-effective drying. All fabrics and materials comply with current FDA or EU regulations on food safety.

Conformity of Food Contact Materials

The fabrics of the SEFAR TETEX DRY range are made from yarns that contain only substances recognized as safe for use with foodstuffs.
